

ITI0209: User Interfaces

13. Practice Session: Finding Data

Martin Verrev

Spring 2026

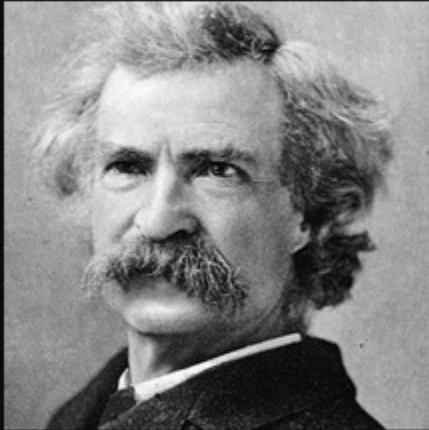

Where do I start?
How does the information relate?
What's most important for me?

Three key elements that characterise a visual data story:

- A series of **story pieces** that present data-driven facts
- Story pieces are **visualised** to support each intended message and each visualisation is supported by annotations or narrations that focus on the intended message
- Each story piece is linked and presented in a **meaningful order** that aims to maximise the objective of the story

We start from facts

Get your facts first, then you
can distort them as you please.

~ Mark Twain

AZ QUOTES

Fact is a raw data given in context.

FACTOURISM

Finns have a term that means
'drinking at home, alone, in your underwear'

SOURCE: factourism.com/source/underwear-drinking

Assignment

We have been working on different topics during the whole semester. Your task is to find and present interesting facts related to your topic.

1. Find at least three interesting facts in the subject area for your project. Do not use synthetic data-sources.
2. Mark them down in Google Sheets:
 - a. First some context then
 - b. At least three facts with: the fact itself; Numeric value; Link to source.
3. Share the document containing the facts

Thank you!
