Week 06: Getting to Know Figma

Martin Verrev

martin.verrev@taltech.ee

Let's Replicate

Hypothetical Scenario:

We have an investor meeting coming up tomorrow and we need to present them with something to convince him. We decided to build the application prototype.

Problem Statement

We get \$ to build a store for cat food. We need to show something ASAP!

We will hand-craft a clickable wireframe with at least the following views:

- Welcome Screen
- Choose a cat food
- Read more (With possibility to order)

The wireframe should have "real" data and possibility to complete the flows.

Home assignment

The customer is a store for third wave coffee. Figure out the primary flow, information displayed and minimal set of views. The views should contain "real" photos and texts.

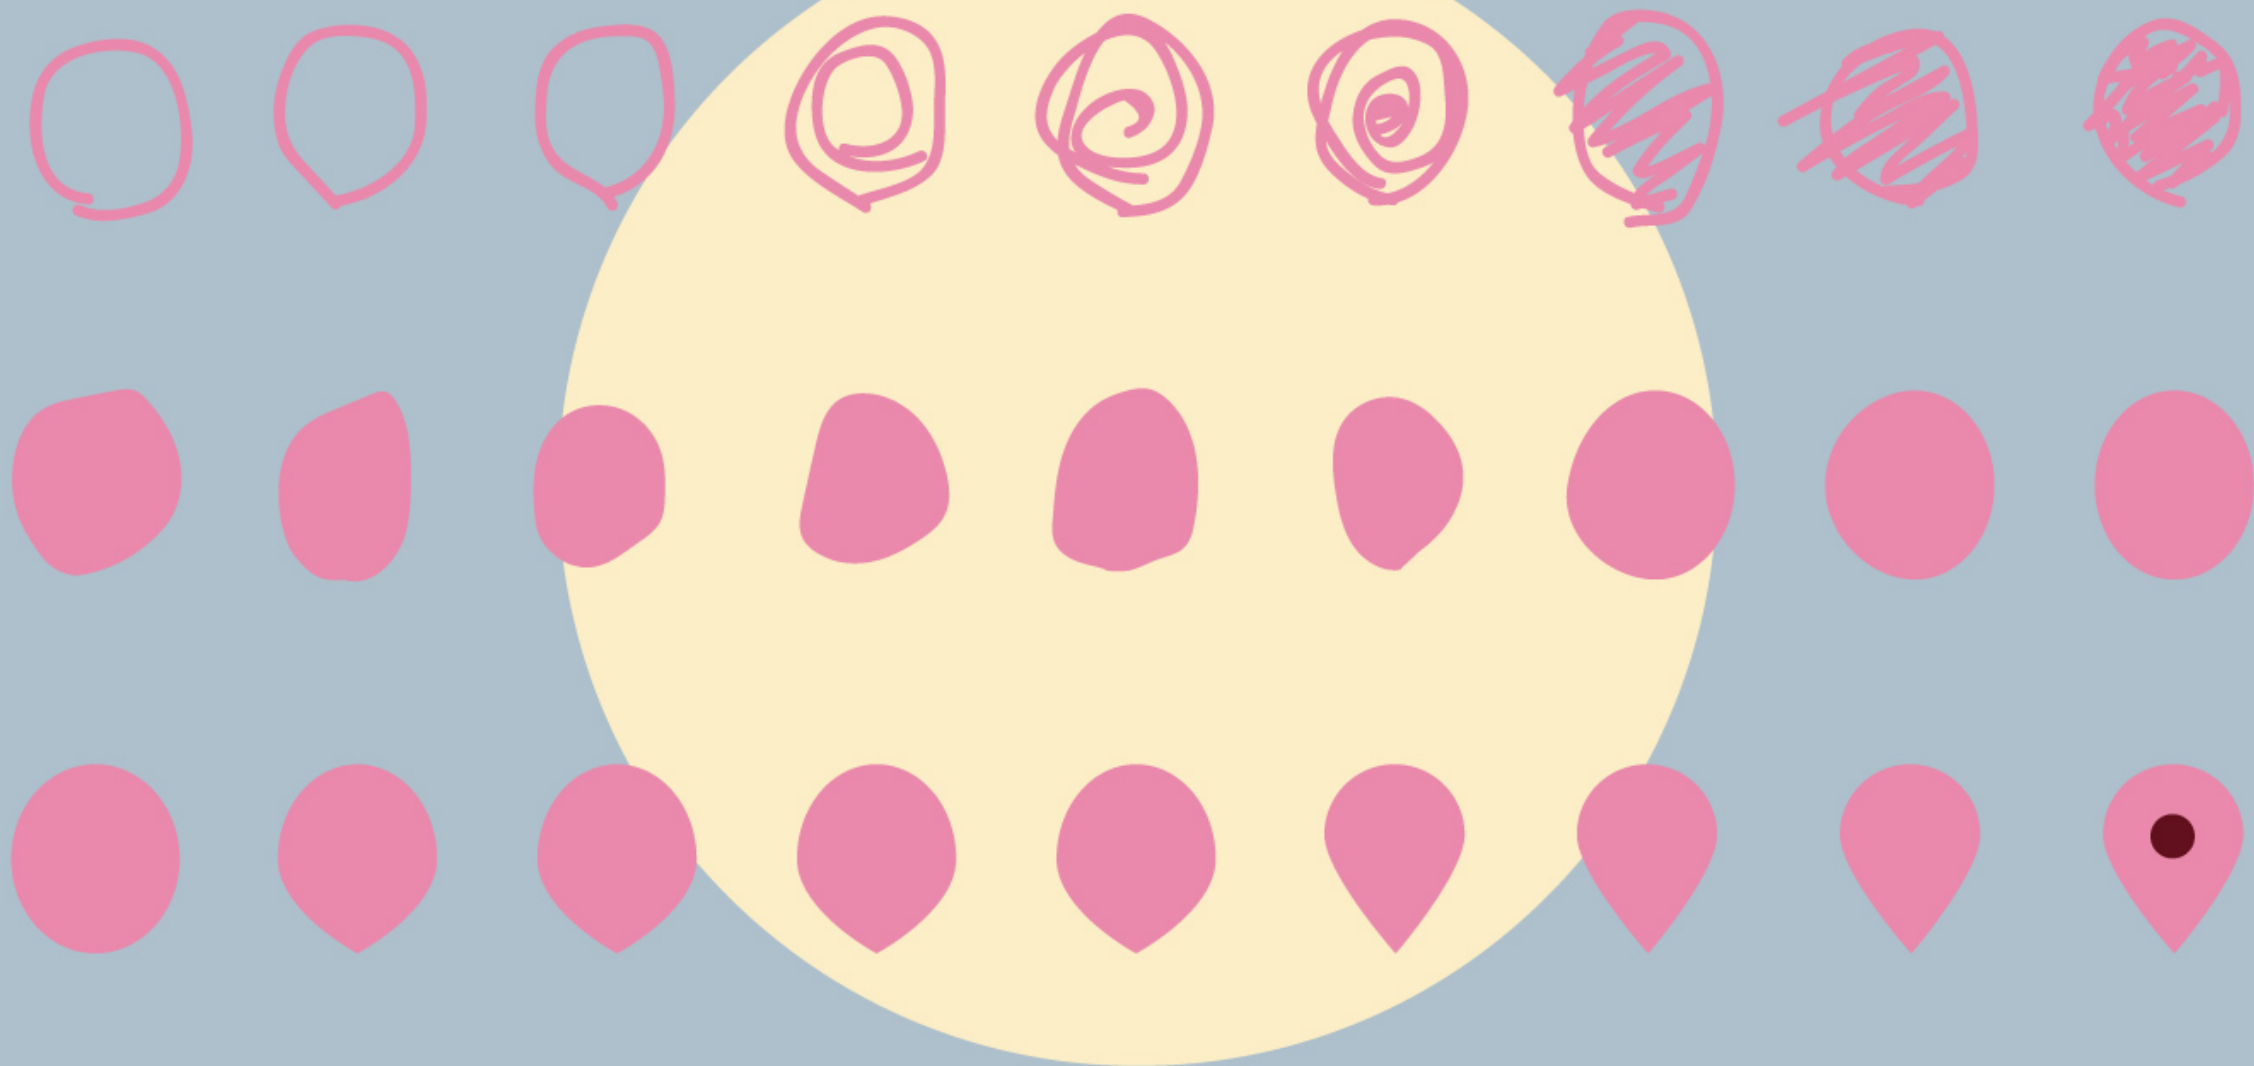

Hand craft the wireframes in Figma and be ready to present them on Thursday, October 24.
